

Greenvale AP

The natural choice for fresh potatoes

MAYAN GOLD

Maincrop

A distinctive variety - ideally suited for processing into gourmet potato products.

Unlike modern European potatoes, **MAYAN GOLD** has its roots firmly planted in the foothills of the Andes of Peru where its ancestors were once farmed by the Incas. **MAYAN GOLD** is a golden coloured tuber with a real taste of history.

Offering a nutty flavour, **MAYAN GOLD** was nationally listed in 2001 and has since proved to be an exceptional variety for chip, crisp and roast manufacturing.

Aimed at the "best in class sector" **MAYAN GOLD** has already been bought by many top chefs, including several currently working on television, for use in their own restaurants, a real testament to the unique taste and flavour of this variety.

Originally developed in association with the SCRI, it has already been successfully grown on a commercial basis in the UK and offers entry into a fast developing sector of the industry.

Helping you to grow

- Golden coloured gourmet potato
- Unrivalled nutty flavour
- Roasts, crisps or chips

Breeder	Scottish Crop Research Institute
Maturity	Maincrop
Market	Specialist Gourmet
Skin Colour	Yellow

FIELD CHARACTERISTICS

Tuber Yield	Medium/Low
Tuber Number	Very High (9)
Tuber Shape	Long Oval
Dry Matter	21%
Flesh Colour	Golden
Eye Depth	Medium
Dormancy	Short (4)
Bruising	6

DISEASE RESISTANCE

Foliage Blight	4
Tuber Blight	4
Blackleg	5
Common Scab	5
Powdery Scab	8
Potato Leaf - Roll Virus	5
Virus Y	5
PCN R01	Susceptible
PCN G.Pallida	Susceptible
Spraing	8*
Dry Rot	6*

1 = susceptible, 9 = resistant,
-- = no data, * = SCRI Data
